This year, we received responses!

Which of any of the USA-NPN available tools or resources did you use in 2022?

What is your level of satisfaction with the following?

What are some areas where you could use additional support?

More resources for data analysis would be helpful.

We would like to see some more online group workshops.

Don’t be afraid to have fun! Connect the science with stories, local folklore, nature journaling.

There were many words of thanks in the survey. We would also like to thank YOU for your enthusiasm, dedication, and love that you put into your programs.
