

Dragonflies and damselflies

(with migration)

Active adults

One or more adults are seen moving about or at rest.

For abundance, enter the number of individual animals observed in this phenophase.

Adults feeding

One or more adults are seen feeding. If possible, record the name of the species or substance being eaten or describe it in the comments field.

For abundance, enter the number of individual animals observed in this phenophase.

Migrating adults

A swarm of adults of mostly the same species is seen flying overhead.

For abundance, enter the number of individual animals observed in this phenophase.

Mating

A male and female are seen coupled in a mating position, usually forming what looks like a circle with their bodies. This can be at rest or in flight.

For abundance, enter the number of individual animals observed in this phenophase.

Egg laying

A female is seen laying eggs directly onto the water surface, or attached to aquatic plants.

For abundance, enter the number of individual animals observed in this phenophase.

Dead adults

One or more dead adults are seen, including those found on roads.

For abundance, enter the number of individual animals observed in this phenophase.

Individuals in a net

One or more individuals are seen caught in a net.

For abundance, enter the number of individual animals observed in this phenophase.

Please see the species profile page for complete information about the phenophases for each species.

Insects

Animal Phenophase Datasheet

Directions: Fill in the date in the top row and circle the appropriate letter in the column below.

y (phenophase is occurring);

n (phenophase is not occurring);

? (not certain if the phenophase is occurring).

Do not circle anything if you did not check for the phenophase. In the adjacent blank, write in the appropriate measure of intensity or abundance for this phenophase (see left-hand column for details).
